computer languages

VOLUME CONTENTS

Volume 24, No. 1 **April 1998**

Daniel E. Cooke	1	*SequenceL* provides a different way to view programming
Christoph W. Kessler	33	Scheduling expression DAGs for minimal register need

Volume 24, No. 2 **July 1998**

Pierpaolo Degano and Corrado Priami	73	LR techniques for handling syntax errors
Owen Kaser and C. R. Ramakrishnan	55	Evaluating inlining techniques
Muhammed Al-Mulhem and Shahid Ali	99	Formal semantics of visual occam
Cumulative Author Index	115	
Calendar of Events	119	

Volume 24, No. 3 **October 1998**

Stéphane Vialle, Yannick Lallement and Thierry Cornu	125	Design and implementation of a parallel cellular language for MIMD architectures
P. Rondogiannis, M. Gergatsoulis and T. Panayiotopoulos	155	Branching-time logic programming: the language *Cactus* and its applications
Bharat Jayaraman, Kannan Govindarajan and Surya Mantha	179	Preference logic grammars

Volume 24, No. 4 December 1998

Stefano Crespi Reghizzi and Giuseppe Psaila	197	Grammar partitioning and modular deterministic parsing
C. K. Yuen and M. D. Feng	229	Active objects as atomic control structures in BaLinda K
M. Chung and R. A. Olsson	245	New mechanisms for invocation handling in concurrent programming languages
